### MANAGEMENT DISCUSSIONS AND ANALYSIS REPORT

### INDUSTRY STRUCTURE AND DEVELOPMENTS:

The Company's primary business is to provide "Futuristic Solutions" to the clients' current problems. As reported by the Government of India, the amount of existing NPA's of various banks and financial institutions are to the tune of about Rs. 1,10,000 crores. Besides this, the quantum of claims and counter claims, arising out of various contractual obligations are many times of this figure. All these clients could restructure their assets using our services. As the business of Asset Reconstruction is a relatively a new field, a very small percentage of the total volume of business targeted by us could generate impressive turnover.

### **OPPORTUNITY AND THREAT:**

Asset reconstruction Companies have been created internationally to bring about system-wide clean up of Non Performing assets (NPA's) in the financial sector. The Government of India and Reserve Bank of India (RBI) have taken measures to regulate and control NPA's in the financial system to facilitate faster debt recovery.

Asset reconstruction business constitutes essentially in unlocking the values embedded in the NPA's and sharing these in an equitable manner with various stakeholders. Theoretically, this is tailor-made for the common wealth of all the concerned players and by now the market should have been a buzz with frenetic action on this front. If this does not happen on the scale anticipated, the reason can be the following:

The concept is relatively new and its philosophy and practice have not seeped firmly in the minds of the players, especially the lenders. With the fear of the unknown stalking their minds, they are understandably wary of taking the kind of plunge that is necessary for giving a discernible fillip to the business.

The various stimulus measures which were introduced by the government and Reserve Bank of India played an important role in maintaining liquidity in the financial system, limiting the spill over impact on the real economy.

There is, of course, always a possibility of the time for realization to become more than envisaged.

### OUTLOOK:

Company sees great potential of growth in the Assets Reconstruction business and has directed their effort towards the same.Company is confident of doing better in the forthcoming financial year.

are approved by the Audit Committee. The internal audit function verifies the adequacy and effectiveness of internal controls from operation, financial and statutory compliance point of view through a blend of process and transactional audits. A summary of significant observations along with any action plan identified by the management is placed periodically before the Audit Committee for review and guidance.
